SUMMARY

React Native Developer with about 1.5 years of experience building cross-platform mobile apps and Node.js/MongoDB backends. Has shipped apps live on the App Store and Google Play, built real-time chat systems with Redis, e-commerce and payment flows, and data-heavy apps handling lakhs of records with SQLite. Learns fast and solves problems independently through documentation and step-by-step debugging.

TECHNICAL SKILLS

Mobile: React Native (CLI & Expo), React Navigation, Android Studio, App Store & Google Play releases

Languages & Frontend: JavaScript (ES6+), TypeScript, React.js, HTML5, CSS3

Backend: Node.js, REST API design & integration

Databases & Caching: MongoDB, Redis (chat & group data), SQLite (large local datasets), MySQL

Integrations: Payment Gateways, Firebase (Google Login), Live Chat, Real-time Messaging

Tools: Git, GitHub, VS Code, AI-assisted development (ChatGPT, Copilot, Cursor)

PROFESSIONAL EXPERIENCE

React Native & Node.js Developer — Eracom Technology, Zirakpur ~1 year · Present

Joined as a React Native developer; grew into backend development with Node.js and MongoDB.

- Build and ship production mobile apps and websites using React Native, React.js, JavaScript and TypeScript, with apps live on the App Store and Google Play.
- Developed a WhatsApp-style messaging app supporting multiple concurrent users, one-to-one and group chats, using **Redis** to manage large volumes of chats and groups.
- Designed backend services with **Node.js and MongoDB**: REST APIs, data models and database handling.
- Built an election app managing **lakhs of user records** (voter details, ward data) using SQLite for fast local storage and retrieval.
- Debugged performance and data-handling issues in live apps and shipped fixes.

React Native Developer — Creative Web Solutions (CodifyGuru), Zirakpur ~3–4 months

- Worked on live client projects and built 3–4 apps, including a book e-commerce app and its CRM: live cart, multi-item management, checkout, **payment integration** and a live chat bot.
- Resolved unfamiliar issues independently using the React Native documentation and systematic debugging.

Training — Logixmart Solutions, Mohali 6 months

- Learned JavaScript, HTML, CSS and React Native; built practice projects on navigation and view management, plus a Tinder-style app with payment integration.

PROJECTS

Ezychat — Real-time Chat App Ezychat · Google Play

React Native · Node.js · MongoDB · Redis

- WhatsApp-style messaging app handling multiple users, one-to-one and group chats, with Redis keeping large chat and group data fast.

Winfield — Election Management App

React Native · SQLite

- Handles lakhs of user records (details, ward and more) with SQLite for efficient storage and lookup.

OYO Movers — Live Production App OYO Movers · App Store

React Native

- Live app on the App Store; worked on live features and fixes in production.

AcadPad & AcadPad Manager — Cricket Academy Apps AcadPad: iOS · Android
Manager: iOS · Android

React Native

- Academy app and a separate manager app for running a cricket academy, live on both stores.

Apsara Kitab Ghar & CRM — Book E-commerce App CRM · Google Play

React Native · Payment Gateway

- Live cart, multiple books, scrolling lists, checkout, payment integration and chat bot; built its CRM app as well.

Other apps: PayServe (payments, Google login via Firebase) · Pick My Property (real estate) · EzyRentals (rental management) · CWS App (dashboard & admin) · MyDairy (records & customers) · Alabla (services) · Renova Metals

EDUCATION

B.Sc Computer Science — SDAM College, Guru Nanak Dev University · 80% 2021 – 2024

12th — PSEB Board · 92% 2019 – 2020

10th — PSEB Board · 88% 2017 – 2018
